The plant aims to analyze and optimize hydrogen production, storage, and end-use processes, with an emphasis on improving energy and technological efficiency at each stage.

Aims to become the largest applied research and development (R& D) center in Chile's history, focused on: clean energy (such as solar and green hydrogen), low-emission and sustainable mining, circular ...

The Chile 2025 renewable energy storage and green hydrogen conference will take place on July 30 and 31 in Santiago, Chile.

The results of our study highlight several significant findings concerning the cost, challenges, and potential advancements in the green hydrogen storage and transportation field.

Green hydrogen opportunities in Chile Chile possesses a large amount of renewable energy resources of more than sufficient quality to allow it to become one of the main exporters of ...

This research evaluates the performance of a combined system of rooftop photovoltaics (PV) integrated with Electrical Vehicles (EV) as batteries (PV+EV) and Green Hydrogen (GH<sub>2</sub>) as energy storage for ...

Enel Chile will soon begin commercial operations of the 67 MW El Manzano battery energy storage system (BESS) in the Santiago Metropolitan Region. This finalizes Enel Chile's first ...

The IV Annual Congress on Green Hydrogen and Renewable Energy Storage, known as RENMAD Chile 2025, is set to take place in Santiago, Chile. This event represents a significant milestone in ...
