Installed capacity: The FTM energy storage market in the country is in its nascent stage. Total installed capacity stood at 28MW/20MWh as in March 2021 across 7 projects across the country at generation ...

India is expecting a cumulative demand of 500+ GWh LiB batteries by 2030. With these huge opportunities, India is also working on appropriate safety standards considering the application, ...

India outlines plan to reach 100GW of pumped storage capacity by 2036 India's power planners are betting on pumped storage to stabilise a grid increasingly dominated by solar and wind, ...

FDRE consists of 4 different configurations, including (1) assured peak power, (2) Round the Clock (RTC) RE with firm delivery during demand hours, (3) Load following power delivery as ...

As India's grid attains higher penetrations of renewables, balancing generation variability through a spectrum of flexible resources, particularly energy storage, ...

Building on India's commitment to ensuring energy access and achieving net-zero goals, this edition will showcase how the country is spearheading efforts to balance energy security with sustainable ...

India is set to expand its pumped-storage hydroelectric capacity to over 100 GW by FY36, bolstering energy storage and grid reliability to support a renewable-powered electricity system.

The IESA Annual Report 2025 is a comprehensive reference that captures a pivotal year in India's clean energy ecosystem. It covers key dev...
