India plans to develop 100 gigawatts (GW) of pumped hydro storage capacity by 2035-36 as part of a broader push to build long-duration energy storage to support a renewable-heavy power...

India's battery energy storage capacity is set to rise nearly ten-fold to around 5 GWh in 2026 from 507 MWh in 2025, reflecting a shift from tendering to execution of projects.

Adani Group --controlled by port-to-power billionaire Gautam Adani --said it will build what it claims to be one of the world's largest battery energy storage system (BESS) with a capacity ...

Record-low bids to build battery energy storage systems in India have sparked fears that some projects could be economically unviable and even pose safety risks, industry experts and...

India is rapidly emerging as a global hub for energy storage, driven by strong government support and a vision to achieve climate resilience and grid stability.

With IFC's support, we are proud to lead the deployment of one of India's first and largest BESS assets in Gujarat. This project represents a strategic milestone in building next-generation ...

Guided by our National Electricity Plan and bold climate pledges, we aim to achieve 500 GW of renewable energy capacity by 2030--a goal that reflects our resolve to lead globally in clean energy. ...

Adani to build India's largest battery energy storage system in Gujarat. Project aims for 1,126 MW power capacity and 3,530 MWh energy storage. Move aligns with India's push for 24/7 ...
