As of 2021, the island of Ireland had 5,585 MW of installed wind power capacity, with 4,309 MW in the Republic of Ireland.

New figures published today show that Irish wind farms provided a third of the island of Ireland's electricity in 2025.

OverviewCapacity GrowthDrivers of wind power expansionState financial supportOffshore wind powerCurrent trendsControversyEnvironmental Impact and Greenhouse gasesAs of 2021, the island of Ireland had 5,585 MW of installed wind power capacity, with 4,309 MW in the Republic of Ireland. In 2020, wind provided over 86% of Ireland's renewable electricity and generated 36.3% of Ireland's electricity demand, one of the highest percentages globally. In 2023, Wind Energy Ireland confirmed that wind farms provided 35 per cent of Ireland and Northern Ireland's electricity in 2023, totalling a r...

Natural Power has supported Statkraft in delivering the Cushaling Wind Farm and co-located battery energy storage system in County Offaly, Ireland, which are now fully operational. The ...

Operating a system dominated by wind and solar, batteries and interconnectors will require new approaches to stability and flexibility. In the Adapted Transition Pathway, renewables would supply ...

The wind project is currently under construction. The battery project will enable energy from renewable sources to be stored during times of low demand, limiting the need for costly ...

With 4.85 GW of total wind capacity as of mid-2024, including 4.83 GW of onshore wind, Ireland remains committed to expanding its wind energy sector. While offshore wind is still in its early stages, new ...

In Q2 2023, a new rotor size record for a wind turbine installed onshore in the Republic of Ireland was set. A 149 m rotor installed at Arderroo Wind Farm [8], commenced electricity export to the Irish grid ...
