Italy's photovoltaic market is soaring past 40 GW in 2024. Discover the key drivers, government incentives, and future outlook for solar installations in Europe's second-largest market.

Solar energy is a key element of Italy's strategy to transition to renewable energy and reduce greenhouse gas emissions. The country aims to achieve a 55% reduction in emissions by 2030, in ...

The Meloni Government delivered the new PNIEC Italy, the Integrated National Plan for Energy and Climate, to the European Commission on 1st July 2024. The document, in its 491 pages, ...

Despite its traditionally volatile politics, Italy has shown remarkable consistency in transforming its energy system. The government led by Giorgia Meloni is driving coal phase-out by ...

In the 2013 National Energy Strategy (NES), Italy established energy aims to achieve by 2020 that rises the 17% EU target for renewable energy in final energy consumption to 19% or 20%.

Italy is racing to meet 2030 renewables targets, but faces grid, permitting, and skills hurdles. Explore what this means for the clean energy workforce.

OverviewEnergy policiesSolar potentialPhotovoltaicsConcentrated solar powerEarly developmentsGovernment targets for renewable energy sources (RES) and different support schemes, especially for solar photovoltaics, resulted in an increase from 7.9% (2005) to 18.2% (2015) in total share of renewable energy in the total primary energy supply (TPES). 1.6% of the 18.2% renewables share is made up of solar energy. From 2005 to 2015 solar power has increased on average by 63.7% per year. The share of renewables in electricity generation has increased from 17.2% in 2005 to 40.2% in 2015, including 9.3...

Italia Solare estimates that the country needs just 1 per cent of fallow farmland to fulfil its 2030 solar commitments -- but warns the new rules will impede the rollout. "We have such a nice...
