His research focuses on electrochemical energy storage systems, mainly supercapacitors, energy policy, electronic waste management, and power systems with integrated energy storage.

The Kingdom of Jordan - BESS is a 20,000kW energy storage project located in Jordan. The electro-chemical battery energy storage project uses lithium-ion as its storage technology. The ...

Jordan BC Solar Project Limited Partnership, a subsidiary of Recurrent Energy, is developing the Jordan Solar and Energy Storage Project (Project), an approximately 100 MW solar and up to 400 MWh ...

The new law aims to improve the efficiency and reliability of Jordan's electricity infrastructure and introduces the concept of energy storage in the country's legislation for the first time.

Amman, April 22 (Petra) -- Energy experts have lauded the Cabinet's recent approval of a grid-scale battery energy storage system (BESS) for the National Electric Power Company's ...

Other storage technologies could take off, such as flow batteries, hydrogen storage or others, but cost reduction and additional developments are necessary to see these technologies being deployed at a ...

The core consists of three parts - photovoltaic power generation, energy storage batteries, and charging piles. These three parts form a microgrid, using photovoltaic power ...

While camels and sand make great headlines, the real story is how a resource-limited nation is punching above its weight in energy innovation. From African nations taking notes to ...
