3MTM Dielectric Tapes Metal Bus Foil solar panels. They consist of a polymeric film with acrylic adhesive on one or both sides. These tapes can be applied at high speeds using automation ...

Single-sided pet tape is suitable for permanently covering metal leads, which can achieve a beautiful appearance and electrical insulation. During the lamination process, fix the leads, which are used to ...

Our front sheet ETFE film provides high levels of resistance to chemicals and weathering as well as low flammability, stress crack resistance, and insulating properties in solar photovoltaic panels.

We have made it easy to find the perfect adhesive tape solution for your solar panel needs. Whether you're mounting flexible or rigid panels, our product finder helps you navigate through various ...

Here, the photovoltaic system is part of the building envelope. Our tapes support seaming and mounting while preserving architectural lines and providing high-performance environmental sealing.

Get custom cut tapes from LAMATEK(TM) for solar panel frame bonding, junction boxes, and edge protection. Separator pads and surface protection films available.

Photovoltaic tapes for the renewable energy market for bonding, venting, insulation, protection & masking. Custom rolls & die-cut shapes available.

Lead-free tin-coated soldering strips are composited with special copper and tin alloy coatings with excellent electrical conductivity and excellent processing ductility.
