-----

In a national action plan issued in May this year, the country pledged to accelerate its construction of large wind power and photovoltaic bases in deserts, and will in the meantime ...

To address the challenges associated with grid integration costs and land consolidation in the site selection of large-scale PV power plants, this study proposes an innovative three-stage ...

On December 14 last year, the World Economic Forum announced a new batch of "Lighthouse Factories," with the LONGi Jiaxing Base becoming the sole factory in the global ...

From innovative battery technologies to intelligent energy management systems, these solutions are transforming the way we store and distribute solar-generated electricity.

Through the efforts of LONGi and other enterprises, Xiuzhou has built a photovoltaic industrial chain ecosystem and increased the district's photovoltaic output value by 274 percent in ...

By leveraging digital tools to enable low-carbon production, deploying rooftop photovoltaic power stations, procuring green electricity certificates and carbon credits, and ...

The power generated by the airship solar array was modeled herein through a combination of the flight attitude, spatial position, time, and other influencing factors. ...
