What are outdoor Telecom cabinets?

Our outdoor telecom cabinets are designed to protect your sensitive network equipment from harsh environments where equipment may be exposed to dust or water. For added protection, there is a water and dust proof polyurethane door joint strip.

What is an indoor Telecom cabinet?

Indoor telecom cabinets are designed for controlled environments like data centers, server rooms, and office spaces. These enclosures provide a secure and organized space for housing telecommunication equipment. Since they are used indoors, they do not require extensive weatherproofing.

How much does a large telecommunication cabinet cost?

Large indoor cabinets are designed for extensive telecommunication systems in controlled environments like data centers. These telecom racks provide ample space for organizing equipment and often include advanced cable management and cooling systems. Prices for large indoor cabinets range from \$2,000 to \$10,000 or more.

Can telecommunications equipment be terminated outdoors?

One of the biggest challenges of terminating your telecommunications equipment outdoors is finding outdoor enclosures that will be able to properly withstand the elements. Temperature, moisture, ice, shock hazards, and UV damage are all potential dangers to consider before purchasing an outdoor enclosure or cabinet.
