Uninterrupted service: For services that need to run 24/7, UPS ensures that the NAS provides uninterrupted service. **Avoid hard drive damage:** A sudden power outage can cause hard ...

This article explores why pairing NAS with an uninterruptible power supply (UPS) is essential, supported by industry data and real-world scenarios. Learn how to protect your data infrastructure effectively.

In this article, we'll cover the key reasons why a UPS is essential for your NAS, highlight the benefits for both personal and business use, and recommend the best battery backup models ...

The hard drives and circuits inside your NAS can go bad due to a sudden power failure or fluctuations. But NAS systems that are connected to a UPS will safely shut down the system so ...

Synology has built-in support for compatible UPS devices, as when the UPS is powering it, it will start to unmount drives and safely shut down. You'll need to make sure that the UPS you want...

A UPS is a must-have for a NAS if you want your drives to live a healthy life, so you might as well get one today, even if you think your power is stable enough to prevent these issues.

Choosing the right UPS (uninterruptible power supply) for your Synology or QNAP NAS (network-attached storage) can be a complex task, as there are many factors to consider.

Losing power from the national grid can wreak havoc on your network-attached storage (NAS) if it shuts down unexpectedly. This is where an uninterruptible power supply (UPS) comes into ...
