Does Spain have a state aid scheme for energy storage?

The European Commission has approved a EUR699 million state aid scheme in Spain to support the deployment of up to 3.5GW of energy storage.

Will Spain support new 'electricity storage projects'?

The European Commission said it will support the construction of 1,800MWh of new 'electricity storage projects' while Spain's Ministry for the Ecological Transition and the Demographic Challenge (MITECO) said it would support a total of 2.5-3.5GW of new capacity, in a separate announcement.

Is Spain a good market for energy storage?

Spain has been tipped as an attractive market for energy storage but final investment decisions (FID) have by-and-large not yet been taken, with developers and operators waiting for the business case to firm up and for grid capacity to become available in upcoming auctions.

What does the new EU Regulation mean for energy storage?

The new regulation aligns with European Union Regulation 2019/943 by formally recognizing storage as a flexibility technology that enhances renewable energy integration and system stability.

The legislation aims to integrate storage into clean energy generation's regulatory framework, avoid penalizing generators who install batteries, and recognize the role of storage as a ...

The European Commission has approved a EUR699 million (US\$760 million) state aid scheme in Spain to support the deployment of up to 3.5GW of energy storage.

Energy storage is a fundamental aspect of the transition toward more sustainable energy sources. This article summarizes the current regulations in Spain regarding energy storage facilities, highlighting ...

The Spanish government approved Royal Decree 7/2025 on June 24, resolving several long-standing obstacles hindering the secure and lawful deployment of energy storage projects. This ...

Spain has overhauled its grid-access rules to support energy storage, granting hybrid renewables-plus-storage projects equal dispatch priority and full revenue rights for stored electricity.

In addition to discussing capacity and flexibility in energy markets, the conference will delve into the
