Independent power producer (IPP) Enlight Renewable Energy is expanding its Gecama Wind Project in Castilla-La Mancha, Spain, by integrating solar PV and battery energy storage ...

Spain's Instituto para la Diversificación y Ahorro de la Energía (IDAE) has issued a provisional funding proposal for the country's first call for innovative energy storage projects,...

Spain has allocated up to EUR200 million (US\$232 million) to fund "innovative" renewable energy and energy storage projects.

Discover how Spain is accelerating renewable energy with large-scale solar, wind, and hydrogen projects, backed by strong policy, investment, and innovation.

It focuses on technologies like standalone battery energy storage systems (BESS), pumped hydro energy storage (PHES), and thermal energy storage. The program supports hybrid ...

By adding 3,400 MW in new projects, Spain is positioning itself as a leader in renewable energy and grid stability. The lessons learned from the April blackout have driven urgent action, ...

This year has been particularly active: 25 of these projects have seen developments in 2025, representing 1,335.62 MW moving forward with favourable environmental impact statements or ...

Altogether, the selected projects will add 2.2 GW of power output and 9.4 GWh of storage capacity. The renewable technologies paired with hybrid storage projects are mainly solar ...
