-----

Microgrids are a smart and reliable power supply alternative, when autonomous power supply or optimizations for higher level grids are needed.

Owners and operators can remotely monitor and optimize renewables-based distributed power systems in real time. The heart of the Stellar platform uses IoT technology and a cloud-based software ...

Our Stellar Edge IoT controller connects with any smart power equipment and sensors sending data to our cloud based Stellar Microgrid OS platform. The Stellar Edge provides local ...

An AI-powered microgrid platform that generates on-site energy, forecasts demand, intelligently balances loads, and stores low-cost energy for use during peak hours.

Monitor and control your microgrids from anywhere with fleet-wide real-time status and data driven insights using the latest in AI and IoT technology.

From inverters and batteries to sensors and generators, you'll be empowered to choose the smart devices and components needed to meet the performance, cost, connectivity, and serviceability ...

Implement and operate your microgrid to produce and consume local energy. Monetize the value of your DER, optimize your bill, and avoid interruptions.

New Sun Road's Stellar product line. Stellar Microgrid OS, Stellar Edge and Stellar Integrated Systems (IS).
