How does a grid tied inverter work?

Grid-tied inverters or grid inverters feed power into the electrical grid by corresponding phase and frequency. These inverters deliver power directly from the solar panels when solar energy is available and shut down automatically if there is a loss of supply from the utility. 1.3. Hybrid Inverter

What is an off-grid inverter?

Modern, off-grid inverters, or multi-mode inverters, can also be used to build advanced hybrid grid-tie energy storage systems. Many off-grid systems also use solar charge controllers (MPPTs), which are DC-coupled between the solar panels and battery, to regulate the charging process and ensure the battery is not over-charged.
