Read all instructions before operating the equipment and save this manual for future reference. Ce manuel comporte des instructions importantes que vous êtes invité à suivre lors de toute procédure ...

Excessive amount of dust in the operating environment of the battery cabinet may cause damage or lead to malfunction. The battery cabinet should always be protected from the outside weather and sunshine.

The battery connectors and cables should be kept in good condition to avoid problems. In extremely dirty environments, the inside of the charger should be blown clean periodically, with air.

This manual contains important instructions that should be followed during installation and maintenance of the UPS and batteries. Read all instructions before operating the equipment and save this manual ...

Refer to "Securing the Batteries Using the Battery Retention Strap" on page 21 for instructions on securing the batteries using the buckle strap provided with the battery cabinet.

The Eaton® External Battery Cabinet (EBC) provides extended emergency short-term backup power for the 93E 20-30 kVA and 40-60 kVA UPS to enhance the usability and reliability of the systems.
