Norway generates 98% of its electricity from hydropower, yet faces seasonal imbalances that new battery systems aim to solve. Oslo's manufacturers have developed cold-weather optimized storage ...

Norway has a unique opportunity to serve Europe with high quality, sustainable and ethically produced batteries, but we must act fast as other countries are building renewable energy capacity and ...

Complementing this tradition, Norway has made significant investments in battery storage systems, propelled by the rapid growth of electric vehicles. Repurposing used EV batteries for...

This article explores how Norwegian lithium battery manufacturers like EK SOLAR address energy storage challenges, support green initiatives, and deliver reliable solutions for industries worldwide.

Last week marked a significant milestone for our company as we proudly received our inaugural Battery Energy Storage System (BESS) shipment in Norway, a nation known for its progressive stance ...

Elinor Batteries has been awarded the contract to supply battery solutions for three new large-scale battery projects in Southern Norway.

Founded in 2020, Morrow Batteries will initially use existing lithium iron phosphate (LFP) technology and its plant in Arendal, southern Norway, is Europe's first gigawatt LFP factory.

But there's good news for Western EV makers: a renewable-energy company called 'Energi' -- a Norwegian hydropower giant -- has been thinking ahead precisely along these lines.
