-----

By container integrated design, energy storage battery clusters, battery confluence cabinets, energy storage converters, transformers, power distribution cabinets and other equipment are integrated into ...

MWh container iron lithium battery energy storage system, using a standard 20feet plus height container layout.

A battery pack and DC confluence technology, applied in the application field of electrochemical battery energy storage, can solve the problems of voltage and power inconsistency, ...

This feature allows for battery module/pack communication with a BMS (battery management system) or for cell testing where the client needs external control via CAN.

Battery pack and module testing is more critical than ever. Today's engineers face new challenges including increased complexity of the tests and set-ups, long development and test times, addressing ...

The company operates 1 foreign manufacturing plant, 2 domestic manufacturing plants, and offers turnkey solutions for battery production, new energy lithium batteries, and lead-acid batteries.

Wobble welding technology enables the creation of strong, defect-free welds with precise control of final joint dimensions and the flexibility to bridge variable gaps between battery pack enclosure walls.

Whether you need an electrolyte solution for your cell development or a large pack for backup power generation, Gotion offers a range of products to meet your varied business needs.
