How many parking spots are there in Paris for electric cars?

Paris now has about 2,200 parking spots specifically reserved for electric cars, inherited from the former Autolib' network. These spaces are a valuable resource for all electric car owners, regardless of their weight. Unlike general road rules, these spots remain free even for vehicles exceeding 2 tons.

What is the revolution in Parisian parking for electric cars?

The revolution in Parisian parking for electric cars is based on a simple but decisive criterion: weight. Since October 1, 2024, all electric vehicles with a service mass not exceeding 2,000 kg automatically benefit from free parking on all paid surface spots in Paris.

Can electric cars be parked free in Paris?

This automatic free parking completely transforms the urban economic equation for owners of electric city cars and sedans. A Renault Zoe, Peugeot e-208, or Tesla Model 3 Standard can now park for free on all Parisian zones, representing potential savings of several thousand euros per year for regular users of electric cars in Paris.

Can a Parisian get free parking if he owns an electric SUV?

For owners of heavy vehicles exceeding 2 tons, resident status allows for 7 days of free parking per month, even on spots subject to increased rates. This measure aims not to penalize Parisians who own family electric SUVs in their residential use.

Last year, Parisian residents voted in favor of banning rental electric scooters from the French capital over congestion concerns and safety fears, in a referendum also organized by the...

The electric vehicle revolution is well underway, but progress is still too slow. Here are three reasons why - and three ways to get things back on track.

With its sights set on banning fossil fuel cars by 2030, Paris is embracing electric vehicles -- and you can take one for a spin around the capital's landmarks. This article was produced by...

Do you have an electric vehicle or an electric motorized two-wheeler? You might be eligible for the "low-carbon" offer, allowing you to park for free in the city, upon conditions.

Fines (FPS) have also increased, with a minimum of EUR100. Between verifying eligibility, procedures for foreign license plates, and parking alternatives like former Autolib" spots or the Belib" ...

"The deployment of electric vehicles and plug-in hybrids is an economic and environmental opportunity for France," the ministry says.

Paris is committed to reducing emissions and improving air quality. With traffic-related pollution still a major concern, the city is offering free or discounted parking for electric vehicles...

Charges for non-residents to park heavier vehicles in Paris will triple from 1 September 2024 in an effort to deter people from driving into the city and reduce traffic to make it safer for ...
