What is the role of the Photovoltaics team?

The Photovoltaics (PV) team supports research and development projects to lower manufacturing costs, increase efficiency and performance, and improve reliability of PV technologies. This is done in order to support the widespread deployment of electricity produced directly from sunlight ('photovoltaics').

Can NREL estimate active power reserve in curtailed PV plants?

The NREL-developed method for active power reserve estimation in curtailed PV plants has been successfully implemented in several utility-scale PV projects worldwide. One such example is the Luz del Norte 141-MW PV power plant owned by First Solar in Chile's Atacama region .

Does NREL control the inverters of the maxgen PV plant?

The MaxGen (former ly SunEdison) PV plant is a commercial 1-MW plant that operates under a PPA with Xcel Energy. NREL does not have control over the inverters of this plant.

Is energy storage a viable alternative to conventional power generation?

The trend to renewables and energy storage becoming an increasingly affordable and viable alternative to conventional sources of power generation is expected to continue to grow in coming years. The state of solar and the impacts of energy storage

Our team of solar and energy storage experts offers customers direct access to discuss the latest market trends, clarify any data and answer your questions.

As countries race to meet climate targets and strengthen energy security, these partnerships are enabling faster project execution, improved access to capital, and large-scale ...

National Laboratory of the Rockies (NLR) bridges research with real-world applications to advance energy technologies that lower costs, boost the economy, strengthen security, and ensure ...

The Photovoltaics (PV) team supports research and development projects that lower manufacturing costs, increase efficiency and performance, and improve reliability of PV technologies, in order to ...

SEIA is the leading advocate for the buildout of energy storage at all scales to drive a more reliable and affordable electric grid. The U.S. solar industry installed 11.7 gigawatts (GW) of new capacity in Q3 ...

Photovoltaic Energy Storage National Team
