The utility model aims to provide a flexible photovoltaic bracket and aims to solve the problem that in the prior art, a photovoltaic plate on a guy cable cannot be subjected to angle...

Prof. Liu's current research interests span the areas of emerging semiconductor devices, micro-/nanofabrication, analog/mixed-single ICs and renewable energy technologies.

To investigate the mechanical performance and failure characteristics of photovoltaic support bracket and connections with the cold-formed thin-walled high strength steel, 55 specimens ...

In the established solar panel brackets system, this article conducts numerical simulation on the brackets and optimizes the design of the main beam part of the brackets based on the analysis results.

The invention relates to the technical field of brackets, in particular to a flexible photovoltaic bracket suitable for complex terrains.

In order to achieve the effective use of resources and the maximum conversion rate of photovoltaic energy, this project designs a fixed adjustable photovoltaic bracket structure ...

The present invention relates to technical field of photovoltaic power generation, in particular it relates to a kind of photovoltaic bracket that may be disposed at container top.

A photovoltaic bracket is an essential component of the installation of solar panels. Its role is to support the solar panel and fix it in the correct position to capture solar energy to the maximum extent.
