We own large laser cutting machines, welding robot, steel cold bending machines, stamping machines and aluminum extrusion machines, and we also have our own hot DIP galvanizing ...

Stäubli has designed a full range of four and six-axis robotic solutions for solar and photovoltaic production. Our specialized robotic arms combine high reliability, precision and dexterity to manage ...

Picture this: a factory where robotic arms dance like solar-powered ballerinas, assembling photovoltaic brackets with micron-level precision. That"s not sci-fi - it"s today"s reality in cutting-edge solar ...

Our cutting-edge machine is designed to streamline the production process of solar PV brackets, offering increased efficiency and precision. With our advanced technology and expertise in ...

Solution display Automatic stamping of solar M-bracket from blanks This line is composed of a 2-station destacker, 6 sets of swing arm stamping manipulators and 5 presses. The destacker...

With global solar installations projected to reach 350 GW annually by 2025 according to the 2024 SolarTech Market Report, manufacturers face unprecedented pressure to deliver high ...

Artificial intelligence and robotics | Meet Maximo The AES Corporation introduced "Maximo" today, the AI-powered robot that enhances solar installation speed, efficiency and safety.

D& H Industries is a leading manufacturer of solar stamping and fabrication for the alternative energy industry.
