For over 15 years, Asahi Kasei has been developing, selling, and providing customer support for our family of engineering plastics optimized for connectors and junction boxes in photovoltaic installations.

Recently, the "Standard for Composite Material Frames for Photovoltaic (PV) Modules" was officially approved as part of the fifth batch of "Strengthening Emerging Industry Standard Projects" for 2025.

Covestro is glad to announce that sales of photovoltaic (PV) modules with frames developed with its polyurethane (PU) composites technology have topped 3 gigawatts. This is a ...

Photovoltaic module systems with Covestro's PU composite frames have been certified by TÜV Rheinland in 2021, showing that this new material can meet the stringent requirements of the ...

BASF engineering plastics are widely used in solar applications, such as mounting systems, solar panels and components. These materials offer design flexibility, light weight, corrosion resistance ...

co-created with Jiangsu Worldlight New Material Co., Ltd (Worldlight), a global manufacturer of PV composite frames. The PV frame, made with an industry-leading total solution that combines ...

The PV frame, made with an industry-leading total solution that combines polyurethanes (PU) composite with a water-borne coating solution, results in an 85% reduction in product carbon ...

Aiming towards a more sustainable plastic use in future BASF and Worldlight's new polyurethane-based PV module frame is the newest addition in the industry. With better efficiency, ...
