Our solar-powered ice maker, available in flake or block ice configurations, provides continuous ice production and storage 24/7. It is a versatile solution for businesses in the agriculture, aquaculture, ...

With our pre-configured solar container unit, you can get going quickly, and the folding solar panels for containers can be deployed in less than three hours. Go big with our modular design for easy ...

Solar cold storage is a cold storage solution that uses solar photovoltaic power generation to power the cold storage refrigeration system and combines it with energy storage devices to achieve all ...

Photovoltaic phase-change cold storage mobile container is a revolutionary cold chain product, combining HeatMate's self-developed nano-eutectic phase change energy storage materials, high ...

With container type cold rooms operating with solar energy, you can easily solve cold storage problems and post-harvest loss problems in perishable foods such as fruits, vegetables, meat and meat products.

Our off-grid refrigerated containers use solar energy to maintain ideal cooling conditions, ensuring freshness and reducing waste. Equipped with high-performance compressors and evaporators, our ...

With container type cold rooms operating with solar energy, you can easily solve cold storage problems and post-harvest loss problems in perishable foods such as fruits, vegetables, meat ...

Scientists from China's Yunnan Normal University investigated the performance of PV-driven cold storage based on an ice thermal storage tank. In these systems, water is frozen during the...
