Explore 2025's top solar panel import trends by country, tariff impacts, and global trade shifts reshaping the clean energy market worldwide.

98% of PV shipments were mono c-Si technology, with 58% TOPCon. Margins for the leading PV wafer, cell, and module manufacturers continued to decline through Q1 2025, due to ...

Roughly 84% of solar cells and modules imported into the US during the fourth quarter of 2023 came from the four southeast Asian countries. Annual import volumes from the four countries in ...

Below is an interactive chart that shows solar module (panel) imports by country. The data comes from an API provided by the US Census Bureau, which is released monthly.

Explore the 2024-25 global solar panel import data, highlighting the top importing countries, major importers, and key trade trends.

In 2024, the U.S. imported 54.3 GW of solar panels, mostly from Southeast Asia. Learn why the U.S. still relies on imports, key trade policies, and future trends.

Future import levels hinge on the outcome of a new US investigation into the alleged illegal import of crystalline solar cells and panels from Vietnam, Thailand, Malaysia and Cambodia.

Data source: U.S. Energy Information Administration, Form EIA-63B, Monthly Photovoltaic Module Shipments Report Note: Includes both domestic shipments and exports.
