NLR analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems.

This report includes summary data for the photovoltaic industry from annual and monthly respondents. Data include manufacturing, imports, and exports of modules in the United States and its territories.

Solar photovoltaic panel prices Average price of solar modules, expressed in US dollars per watt, adjusted for inflation.

Berkeley Lab collects, cleans, and publishes project-level data on distributed* solar and distributed solar+storage systems in the United States. The data are compiled from a variety of sources, ...

Solar Photovoltaic market was valued at USD 323.5 billion in 2025. The market is expected to grow from USD 345 billion in 2026 to USD 694.5 billion by 2035, at a CAGR of 8.1% from 2026 to 2035. ...

An average of 3.3 million new roofs (new build or replacement) are expected to be installed across America annually through 2030, creating the potential for 30 gigawatts of solar ...

There are now 262 gigawatts direct-current of solar capacity installed nationwide, enough to power 45 million homes. In the last decade, solar deployments have experienced an average annual growth ...

Which US state is installing the most solar panels? Texas is the state with the highest number of new solar installations in the US, followed by California and Florida.
