It can smooth power production, reduce the impact on the power grid, improve the tracking capability of planned production, and reduce the phenomenon of wasted wind and solar energy.

The project will supply 42 million kWh of clean electricity annually, providing solid support for Romania's efforts to optimize its energy mix and accelerate its green and low-carbon transition.

This joint project was started in 2018 and completed in 2019 by State Grid Electric Power of Henan Co., Ltd. and Pinggao Group Co., Ltd, on the basis of the existing 16 substations in Henan...

In Pinggao Group's integrated workshop, precision automated equipment can assemble the various components into energy storage devices at extremely high speeds and accuracy.

As the world moves towards a greener future, the importance of advanced energy storage solutions like Pinggao becomes evident. The multifaceted benefits of this technology ...

Hyosung Heavy Industries and Pinggao Group are the first companies contracted to provide large lithium-ion batteries to Eskom for its massive battery energy storage system (BESS).

It is a major technical equipment pillar enterprise in China's electrical industry, with world leading research and development capabilities for large-scale high-end power equipment and industry ...

China network comprehensive energy service group energy storage project The project, invested and constructed by China Energy Engineering Group Co., Ltd., (CEEC), has set three world records in ...
