How do you charge an electric car?

Charging your electric car means connecting the vehicle's battery to a power source. A cable transfers electricity from the source to your car's battery. Charging power varies depending on the type of outlet and installation used. Contrary to popular belief, charging an EV is as easy as charging a phone.

How do I charge my EV?

Get the charging cable. Whereas home chargers often have a built-in cable, it's more common for public charging stations to require you to bring your own. Usually, your EV's manufacturer will provide a suitable public charging cable for your region, so it's worth always keeping it in your car's trunk. Connect the car to the charger.

How do I charge a car with a plug and a port?

Once you have your plug and your port, you are ready to connect the two and start charging. 4. Start the charging session. Pay directly at the charger with a credit or debit card, similar to a fueling station, or use a smartphone app from the charging network to authenticate the session and pay.

How do you charge a car with a cable?

Connect the car to the charger. If the cable is built-in to the charger, you just need to connect it to your car's charging port, often located on either side or under the badge at the front. If you're using your own cable, you'll have to plug this into the public charging station as well.
