Which data center markets have the most data center operators?

Virginia once again leads the 97 markets analyzed with the largest variety of data center operators present in the market. However, Virginia is an outlier in many respects, including operator diversity. London ranks second, followed by APAC markets Tokyo, Shanghai and Seoul, rounding out the top five for operator presence.

Which data center markets have dropped out of the top 10?

Conversely, Tokyo, London, Mumbai and Sydney have dropped out of the global top 10 established data center markets, making way for new entrants Beijing and Shanghai. Much of the ranking movement in established markets this year revolves around power availability, land availability, land prices, and power costs.

Are data center land prices rising in emerging markets?

While competition for land in established markets has driven prices up, they remain below the average levels seen in APAC and EMEA. Emerging markets truly shine in this category, with eight of the 10 most affordable markets for data center land in the Americas.

Why do large markets have a high demand for data centers?

Typically, large markets experience steadier demand due to their established talent pools for building and operating data centers, robust infrastructure and scalability. Globally, 13 markets boast operational capacities exceeding 1GW.

Get detailed info about Data center cost as per no. of racks and all others information like total it load in MW, area required (sqft), IBMS load, required cooling load, UPS sizing & DG sizing. Enter below No. ...
