Global lithium-ion battery prices continued their downward trajectory in 2025, with average pack costs falling 8% to \$108 per kilowatt-hour, according to BloombergNEF's annual ...

According to BloombergNEF, lithium-ion battery pack prices dropped to a record low of \$115 per kilowatt-hour in late 2024, representing a 20% decrease from 2023. In 2025, we've seen a ...

Lithium powers lithium-ion batteries for EVs, energy storage, and electronics. Trusted price data help producers and buyers meet rising demand in the global clean energy transition.

Global cumulative lithium-ion battery capacity could reach 5500 GWh by 2030. Incorrys expects battery pack prices to continue to fall through 2030 and could drop well below \$100/kWh. ...

While the pace of price decreases has slowed, lithium-ion battery packs have reached a new record low in 2025. According to the latest analysis by BloombergNEF (BNEF), prices have...

Price Trends Lithium-ion battery pack prices have consistently declined over the past decade, reaching a record low of \$108 per kilowatt-hour in 2025, an 8% drop from 2024 5. This ...

In this work we describe the development of cost and performance projections for utility-scale lithium-ion battery systems, with a focus on 4-hour duration systems. The projections are developed from an ...

Raw Material Trends: The Impact of Stabilized Lithium and Sodium Prices The era of the lithium price rollercoaster is over. In 2026, lithium carbonate prices have settled into a predictable low ...
