Can a PPA buy a solar project?

Buyer Options to Purchase the Project or Special Purpose Entity. Many utilities have shown a strong interest in owning solar energy projects. In PPAs, this interest often takes the form of an option to purchase the project or the entity that owns it on or after a specified date. Such options should be handled carefully.

What is a PPA & a solar lease?

In some states, however, the PPA model faces regulatory and legislative challenges that would regulate developers as electric utilities. A solar lease is another form of third-party financing that is very similar to a PPA, but does not involve the sale of electric power. Instead, customers lease the system as they would an automobile.

Why are PPAs negotiated for buying Clean Power off-site?

That's why most PPAs are negotiated for purchasing clean power off-site. There are two main types of off-site PPA: physical and financial. Physical or 'sleeved' PPAs see an agreed volume of clean power physically transported from a renewable energy generator to a corporate buyer via the public grid.

Are energy Hedges better than PPAs?

Energy hedges and CFDs have some advantages over PPAs, and they are often favored by commercial/industrial offtakers because they avoid triggering state laws that may restrict direct retail sales--one of the reasons that CFDs and VPPAs are often the type of agreement preferred by corporate offtakers.
