-----

A photovoltaic project with a power generation capacity of 900 megawatts (MW) went into operation on Sunday in northwest China's Qinghai Province.

It is one of the biggest floating photovoltaic power generation farms in the world, said the plant. "We conducted thorough checks on the panels to identify any issues such as cracks that could ...

Successful grid connection for entrance into a new stage of self-generation and self-consumption of green electricity

It's not hard to see why there has been a mad rush to roll out a veritable carpet of solar panels across the region, along with other green energy power generation plants: Qinghai boasts ...

Xining - Amid China's green energy revolution, the world's largest solar photovoltaic power plant on the Qinghai-Xizang Plateau is forging a unique development path, simultaneously generating electricity ...

Construction is in full swing to build a 200,000-kilowatt concentrated solar power (CSP) generation system in Delingha City, northwest China's Qinghai Province.

The rise of photovoltaic parks on the Qinghai-Xizang Plateau has brought new job opportunities for locals and transformed their traditional nomadic lifestyle of long-distance grazing. ...
