Here is the list of world's leading renewable energy generating countries in the world. 1. China is a global leader in wind energy generation. The country had a significant installed capacity ...

3 days ago; It's no surprise that Texas has the most wind turbines of any state since it is ...

It's no surprise that Texas has the most wind turbines of any state since it is the country's frontrunner in wind energy generation. The Lone Star State has 19,393 active wind turbines, ...

China, with 145,362 MW of installed capacity, is the world's largest ...

Together, China and the United States generated 50.6% of the world's wind power in 2021. A full 9% of the country's electricity came from wind power in 2021, making wind the largest source of renewable ...

This visual shows the top 15 countries by total installed wind turbine capacity, based on data from the Energy Institute's 2025 Statistical Review of World Energy report.

China, with 145,362 MW of installed capacity, is the world's largest generator of electricity from wind energy. India is the second largest in Asia with an installed capacity of 25,088 MW. [6]

The world's installed wind power capacity now meets well over 10% of global electricity demand - and much more than nuclear power. More than 30 countries now have a share of wind ...
