Are there state-level incentives for solar energy storage?

To date, state-level performance incentives for storage have typically been added to solar incentives. Perhaps the best-known state-level storage incentive in the US is California's Self-Generation Incentive Program (SGIP). SGIP provides a dollar per kilowatt (\$/kW) rebate for the energy storage installed.

What is the best incentive for solar storage?

The best incentive for storage is the federal investment tax credit (ITC). The exact same ITC that provides a 30 percent credit on the cost of your solar system provides that same benefit to storage systems under certain conditions.

Do you have a waitlist for residential solar and storage Equity Project funding?

Some customers may experience a waitlist for Residential Solar and Storage Equity project funding. These SGIP incentives cover the majority of the cost for the installation of solar and energy storage technology.

How do solar incentives work?

These incentives typically take one of two forms: an upfront rebate or a performance-based incentive. Rebate programs are exactly what they sound like: states provide a direct cash payment after your battery is installed and connected to the grid. To date, state-level performance incentives for storage have typically been added to solar incentives.
