Riyadh's story arcs from Diriyah, the 18th-century birthplace of the first Saudi state, to Al Masmak Fortress, where Abdulaziz Ibn Saud's 1902 raid lit the fuse for unification, to a post-oil boom ...

Riyadh is Saudi Arabia's capital and largest city. It became the capital of the Saud dynasty in 1824 and, except for a brief period in the 19th century and early 20th century, has been ...

Our study recommends integrating constant NPPs with intermittent PV systems using compressed air energy storage (CAES). Liquid piston used in CAES enables efficient quasi ...

The comparison and discussion of these CAES technologies are summarized with a focus on technical maturity, power sizing, storage capacity, operation pressure, round-trip efficiency, ...

The Gulf's energy storage race feels like a camel derby with billion-dollar stakes. While Dubai flaunts its solar-panel skyscrapers, Riyadh counters with the world's largest underground ...

Compressed-air-energy storage (CAES) is a way to store energy for later use using compressed air. At a utility scale, energy generated during periods of low demand can be released during peak load ...

Compressed air energy storage (CAES) is one of the many energy storage options that can store electric energy in the form of potential energy (compressed air) and can be deployed near central ...

An adiabatic compressed air energy storage (CAES) system integrated with a thermal energy storage (TES) unit is modelled and simulated in MATLAB. The system uses wind power ...
