Located off the coast of Fengxian district on the northern shore of Hangzhou Bay, the project forms part of Shanghai's broader strategy to integrate offshore wind and solar energy. It will ...

A giant 16.2-megawatt land-based wind turbine, the largest single-unit onshore wind power generator in China, has been successfully installed in the eastern province of Jiangsu, marking a breakthrough in ...

Thanks to continuous efforts, State Grid has expanded power grid coverage, enabled China to lead the world in installed capacity for grid-connected wind and photovoltaic power, and ...

Our results highlight the importance of upgrading power systems by building energy storage, expanding transmission capacity and adjusting power load at the demand side to reduce the ...

China's State-owned Assets Supervision and Administration Commission of the State Council (SASAC) has recently announced the successful inauguration of the Caipeng photovoltaic ...

Few studies have optimized global deployment of photovoltaic and wind power. Here we present a strategy involving construction of 22,821 photovoltaic, onshore-wind, and offshore-wind...

As a result of new solar projects coming on line this year, we forecast that U.S. solar power generation will grow 75% from 163 billion kilowatthours (kWh) in 2023 to 286 billion kWh in ...

Since the beginning of the year, the State Power Investment Corporation Limited (SPIC) has made steady progress in a series of major projects. By the end of February, construction had ...
