What are SDIC's largest solar projects?

One of SDIC's largest solar projects is the Qinghai Delingha Solar Power Plant, which is a 200 MW CSP plant located in the Qinghai Province. The plant uses parabolic trough technology to concentrate sunlight onto a heat transfer fluid, which is then used to generate steam and drive a turbine.

Where are SDIC solar plants located?

SDIC's gas-fired plants are located in various regions across China, including Guangdong, Hubei, and Shaanxi. SDIC is a major player in the solar industry in China, with a number of large-scale solar projects in operation or under development.

What does SDIC do?

SDIC, established in 1995, has global operations across a wide variety of sectors within infrastructure, financial and emerging industries. The company owns and operates hydropower, wind farms, photovoltaic plants, with a total installed capacity of 34.06GW - 54% of which is from renewable generation.

Where are SDIC wind projects located?

SDIC has a growing portfolio of wind projects in China, with a focus on both onshore and offshore wind. The company's wind projects are located in various regions across China, including Inner Mongolia, Hebei, and Fujian. One of SDIC's flagship wind projects is the Rudong Offshore Wind Farm, which is located off the coast of Jiangsu Province.

The company's solar projects are focused on both utility-scale and distributed solar, and include both photovoltaic (PV) and concentrated solar power (CSP) technologies.

PV Installation Capacity: The planned installed capacity is 400MW on the AC - side, and 522.36288MWp on the DC - side. It is planned to use 958,464 monocrystalline silicon PV modules ...

By the end of 2024, SDIC Power has put into operation a holding installed capacity of approximately 44.6347 million kW. The installed capacity structure is dominated by clean energy, with an excellent ...

The result of the bid for the procurement of photovoltaic modules for the 200 MW PV project in Shangyi County by State Development and Investment Corporation (SDIC) was recently ...

SDIC Power is a long-term buy for investors betting on China's energy transition. While near-term earnings
