Covering energy, waste management, air quality, noise, odor, and restoration of the ecosystem, Seoul's environmental policies proactively address the climate change of international concern, providing a ...

Seoul impressed the jury with its massive Sunlight City solar program and its innovative financing schemes and outreach campaigns, including the Eco-Mileage program.

Solar power in South Korea has developed from small-scale research programs of the 1970s into a key component of the nation's renewable energy strategy. South Korea has expanded solar photovoltaics generation with tools and initiatives such as legal frameworks, feed-in tariffs, national basic energy plans, and municipal programs. Installed photovoltaic capacity grew rapidly in the 2000s and 2010s, but despite years of progress, the nation's solar sector faces challenges such as pollution, atmospheric co...

South Korea has expanded solar photovoltaics generation with tools and initiatives such as legal frameworks, feed-in tariffs, national basic energy plans, and municipal programs.

By 2022, every public building and one million homes in the city are set to be solar-powered, thanks to the Solar City Seoul project.

This article was prepared by the ICLEI East Asia Secretariat based on information and resources provided by the Seoul Metropolitan Government. The views and interpretations expressed ...

South Korea has had an innovative eco-friendly cycle path with solar panels since 2014, which not only facilitates mobility but also generates clean energy.

As the city appointed sunlight-energy that is free of particulate matter and greenhouse gases as well as capable of being sustainably supplied-as its new driving force for growth, Seoul will be conducting ...
