Energy production includes any fossil fuels drilled and mined, which can be burned to produce electricity or used as fuels, as well as energy produced by nuclear fission and renewable power sources such ...

While there has been growing global emphasis on electric vehicles (EVs) to reduce carbon emissions, Sierra Leone lacks the necessary infrastructure for EV adoption, such as charging stations and ...

Sierra Leone has committed to several renewable energy projects over the past few weeks to increase its low electricity access rate, with the most notable encompassing a major ...

Sierra Leone has unbundled power generation from transmission and distribution. Private sector partners are being invited to participate in generation and metering projects. The Government is ...

Electricity production is predominantly dependent on hydropower, which, in 2022, accounted for approximately 90.8 percent of the nation's total installed capacity. Other electricity generation ...

Whether it is the six hospitals, -- in Freetown, Kambia, Masanga, Kabala and Bonthe -- that solar will now power, or by the completion of 49 mini-grids, functional as of July, that are ...

Very few people have access to electricity in Sierra Leone: Approximately 10% to 12% of the urban population and only around 2% of the rural population. Petrol or diesel generators are often used ...

Sierra Leone also has significant renewable energy potential, including over 1,000 MW in hydropower, 240 MW in solar capacity, and untapped biomass resources from agricultural waste.
