What is the best solar power generator for camping?

Say you need a solar power generator for a few days of camping, over the course of which you're hoping to power a few small devices, a string of lights, and maybe even a small electric cooler--the Anker Solix C800 Plus is the perfect little unit. About the size of a shoebox and just 24 pounds, it's as portable and compact as can be.

Is a generator necessary if the sun is rising?

Although the sun rising provides a natural power source, you will still need solar panels to effectively harness this power and have enough capacity to power your devices. Ideally, sunny weather is also required to ensure you have plenty of power on standby when needed. Choosing the right generator means pairing it with suitable solar panels.

What makes a good solar generator?

Solar generators need to keep the power coming in and going out. The best solar generators can simultaneously charge all your intended devices via whatever plugs are necessary. Any portable power station worth your money will have a high output capacity so you can charge many devices, even if they require a lot of juice.

What are the best small solar generators?

The Explorer 500 is one of the most popular small solar generators on the market. This 500-series power station from Jackery has been on the market since 2019, and with its friendly industrial design and bright orange-and-black utilitarian look with monochrome LCD, it has spawned many clones.

Whether you're seeking a highly portable option or need one that's heavy-duty enough for extended use, these are the best solar generators we've tested and researched to date.
