If you are interested in applying for project support under Portugal 2030, this basic guide will outline the key steps to help you navigate the process effectively.

The batteries will allow Galp to store the solar energy produced in periods of high generation, and to deploy it during periods of high demand, maximizing the energy's value.

Endesa's Atalaia solar project is under environmental assessment until next Tuesday. Atalaia is part of the Pego Hybrid Cluster awarded to Endesa in 2022, which will feature solar, wind, ...

Portuguese energy firm Galp and Powin, a US-based energy storage integrator, completed the commissioning and injected the first electrons of stored energy to the grid from a utility ...

In two state-of-the-art solar installations, Exide Group is powering its battery production and recycling facilities using advanced lead battery energy storage.

StorSystems bring together Portuguese and international experience of energy storage and battery storage development, ownership and operation.

Hyperion's first battery storage projects in Portugal, located in Estremoz and Évora. Co-located with solar PV plants, enabling energy to be stored during peak production hours.

Portuguese energy giant GALP has announced construction of five battery projects, with a total capacity of 74 megawatts (MW), to store solar energy in Spain and Portugal.
