This Solar Demand Study has illuminated market perceptions, barriers, and the growing interest in solar energy adoption.

A study on understanding demand for solar energy in Suva, Fiji (2024), revealed that nearly 88 percent of Fiji's urban-central households were willing to invest in solar energy systems, ...

This Solar Demand Study was designed to better understand current and potential demand for rooftop solar, as well as different market segments' perception, knowledge, incentives, barriers, willingness ...

The solar panels, installed by Sunergise's engineering partner Clay Energy, enable Mark One to save thousands of dollars in electricity costs and "green" its carbon footprint.

A 2024 study on solar energy demand in Suva, Fiji, found that almost 88 percent of urban-central households were open to investing in solar energy systems, with 50 percent expressing ...

With a pressing need for investment and innovative financing options, the country is exploring the potential of solar energy. Recent findings reveal a strong willingness among urban ...

In the last 5 years, there has been rapid growth in "behind the meter" solar photovoltaics (solar PV) installations for several commercial companies around the main island of Fiji, Viti Levu.

So far, we have conducted calculations to evaluate the solar photovoltaic (PV) potential in 3 locations across Fiji. This analysis provides insights into each city/location's potential for harnessing solar ...
