Explore the rapid growth of solar power in Finland, backed by EUR16.6M in subsidies. See how Finland's solar energy strategy is paving the way to carbon neutrality.

Finland's solar and storage sectors are heating up. Explore the 23 GW+ pipeline, bold PPAs, and the AI-powered BESS shaping its energy future.

Contrary to popular belief, Finland's solar energy potential doesn't fall short of that of Central Europe. In the summer, the long days and nearly round-the-clock sunlight compensate for ...

These findings highlight the importance of diversifying renewable generation, improving capacity factors, and investing in energy storage to support Finland's 2035 carbon neutrality target.

Solar power is a key part of Finland's and Europe's green transition. Yet its rapid expansion may bring unintended consequences: a new study shows that large-scale deployment of ...

Solar power in Finland is contributing to the transition towards low-emission energy production. Technological development, falling costs and climate goals have together accelerated ...

Official data covering Finland's smaller-scale solar installations in 2025 is yet to be published. Last June, the Finnish Energy Authority said Finland's cumulative solar capacity reached ...

Finland's utility-scale solar capacity soared in 2025, adding a record 227 MW. The article covers major projects like Utaj&#228;rvi, Europe's northernmost large-scale park in Simo, upcoming ...
