---

One or more embodiments of the present disclosure provide a hollow glass assembly for a solar photovoltaic curtain wall, including an outer glass, an inner glass, the inner sides of the...

The glass filled hollow solar cell film assembly comprises a first support structure and a packaging structure which are disposed on the edge of the front plate cell slice and the backboard, a second ...

The utility model relates to a hollow assembly for building integrated photovoltaic (BIPV).

Our portfolio includes not only automatic solar panel production lines, but also individual equipment for PV modules production, from glass loading equipment at the beginning to solar panel assembly and ...

A solar glass assembly configured to generate energy and including a framing assembly having a plurality of framing elements enclosing a cavity, an upper frame surface, and a lower frame surface ...

PV Cells are laminated between a Glass Front and Protective Backsheet using an encapsulant Encapsulation provides mechanical protection, moisture protection and electrical insulation

There are multi-layers which holds several solar modules at one time. Each layer is made of few holding pins covered with plastic or rubber sleeve which prevents scratch and sliding of solar modules.

QUANTUM is a China-based global supplier of PVB, PDLC, TPU, EVA and other functional plastic thin films. It also distributes ultra-clear patterned solar glass as well as solar PV modules globally.
