Should I add batteries to my solar energy system?

Adding batteries to your solar energy system can increase your savings, improve energy independence, and keep your home powered during outages. This section is your guide to how batteries work, the different types of batteries, and why it's a good idea to add one or more batteries to your solar energy system.

What kind of batteries do solar panels use?

The batteries store the electrical energy generated by the solar panels. There are different types of batteries available, including lead-acid, lithium-ion, and nickel-cadmium, each with its advantages and disadvantages.

Which battery is best for solar energy storage?

For solar energy storage, lithium-ion, lead-acid, AGM, and gel batteries are commonly used. Lithium-ion batteries are highly efficient and long-lasting but are more expensive. Lead-acid batteries are budget-friendly but have a shorter lifespan.
