How much do solar panels cost?

If you just need a few panels for a small do-it-yourself project, expect to pay around \$200 to \$350 per panel (between \$0.80 and \$1.40 per watt). These prices don't include the cost of a solar storage battery, which can add anywhere from \$7,000 to \$18,000 to your total solar system costs.

How much does a home solar system cost?

According to studies by the U.S. Department of Energy, the all-in cost of a home solar panel system is between \$2.74 to \$3.30 per watt. ^{1,2,12} This figure includes the solar panels, the installation, and other expenses. Using these numbers, an average-sized 8-kilowatt residential solar system would cost between \$21,900 - \$26,400.

Why do solar panels cost so much?

The size of your solar power system, measured in kilowatts (kW), is the most important factor affecting solar panel prices. Naturally, larger systems cost more than smaller ones, but they usually offer a lower cost per watt. Solar panels typically account for 12 - 18% of the total installation cost.

How much does a 12 kW solar panel cost?

Your state's averages matter more than national numbers, and factors like shading, roof complexity, and local incentive programs all play a role in your final price. The average cost of a 12 kW solar panel installation on EnergySage is \$30,505 before available incentives.
