```

A photovoltaic system, also called a PV system or solar power system, is an electric power system designed to supply usable solar power by means of photovoltaics.

Solar photovoltaic power generation is called

Source: <https://www.elalmacendelaireacondicinado.es/Tue-03-Jan-2017-2768.html>

The majority of the world's solar power comes from solar photovoltaics (solar panels). China has dominated the solar industry, holding more than 37 percent of the global installed capacity ...

Solar power, also known as solar electricity, is the conversion of energy from sunlight into electricity, either directly using photovoltaics (PV) or indirectly using concentrated solar power.

A photovoltaic (PV) cell, commonly called a solar cell, is a nonmechanical device that converts sunlight directly into electricity. Some PV cells can convert artificial light into electricity.
