To increase the production of renewable energy and reduce the environmental impact of the coal operations for power generation in Kosovo

The project concerns the development of a 100MWac solar photovoltaic power plant (120 MWp), located between Obilic and Fushe Kosova, in close proximity to Pristina, in Kosovo.

Solar panels generate electricity under sunlight, and through charge controllers and inverters, they supply power to the equipment of communication base stations, with batteries acting as energy ...

Emerging markets in Africa and Latin America are adopting mobile container solutions for rapid electrification, with typical payback periods of 3-5 years. Major projects now deploy clusters of 20+ ...

Pre-fabricated containerized solutions now account for a?| Unlike high-capacity industrial models, low power units (300W-3kW) solve specific regional challenges like partial solar integration and space ...

Such a crisis of lack of electricity occurred several months ago, so the construction of new electricity sources in Kosovo should be an imperative of the time. However, it should not be forgotten ...

A significant project called Solar4Kosovo is underway, which aims to install a solar photovoltaic plant with a capacity of up to 100 MW on former ash dump fields near the Kosovo A ...

To support the green transition in Kosovo*, one of its largest solar photovoltaic plants will be constructed on former ash dump fields near Pristina with a capacity of up to 100 MW.
