Will China's solar power sector slow down in 2026?

Representational image/Pixabay China's solar power sector is bracing for a sharp slowdown in new installations in 2026 after a major policy overhaul last year altered how renewable energy projects are paid, threatening to dent revenues and unsettle investors.

Are solar farms affecting power grids?

The breakneck addition of solar farms, which generate electricity only when the sun shines, has piled pressure on power grids already struggling to integrate large volumes of intermittent supply.

Will China's Solar Power overtake coal?

The forecast comes even as China's solar capacity is poised to overtake coal as the country's largest source of installed power capacity this year. But the pace of expansion that defined the past few years appears set to moderate sharply. Semiconductors, defence and more...

How will new wind and solar tariffs affect power prices?

Under the new rules, wind and solar generators must sell power at market-based rates instead of benefiting from government-regulated tariffs. The shift is widely expected to compress margins, particularly in regions where wholesale power prices are volatile or weak.

Revolve Renewable Power has completed the acquisition of a 30 MW mid-stage development solar project in Alberta, Canada. The project acquisition, first announced in September,...

Arizona Public Service (APS) has signed agreements in what it calls the company's largest-ever planned addition of new power sources.

Spanish households and companies installed fewer rooftop solar power systems last year after the withdrawal of some tax deductions, solar industry ...

RIC Energy has sold seven PV plants in upstate New York with a combined capacity of 34 MW to Radial Power.

The Energy Information Administration's "Electric Power Monthly" report through November 30, 2025, indicates that solar PV remains the fastest growing source of...

Latest news on the solar energy and photovoltaics industry in the USA: installations, manufacturing, markets

& policy, and technology.

All the top recent events in solar thermal and photovoltaic market. The latest research, innovative technologies, industry trends and forecasts, financial ...

Renewable America, a provider of distributed energy resources in California, is providing over 15 MW of solar power coupled with 8 MWh of energy storage to four different community choice ...
