---

Here's a Nordic twist: China's CATL partnered with Norway to build underwater energy storage pods in fjords. The cold water naturally cools the batteries, boosting efficiency by 20% ...

Norway is advancing hydrogen utilization across industries and energy storage applications by piloting various initiatives.

Egyptian President Abdel Fattah Al-Sisi met on Sunday with Terje Pilskog, CEO of Norway's Scatec, and Ko Renxian, founder of China's Sungrow, along with Prime Minister Mostafa ...

Driven by a combination of limited capacity to integrate variable solar power into the local power systems of the western region and air pollution control policies that increasingly constrain coal use in ...

The first project, titled "Energy Valley," will be developed by Scatec in Minya Governorate. The 1.7-gigawatt (GW) solar power plant will be integrated with 4 gigawatt-hours (GWh) of Battery ...

However, despite the renewable energy boom, China's power system still struggles to absorb all of the generation, making energy storage - which bridges temporal and geographical gaps ...

Scatec said it has signed power purchase agreements covering a total capacity of 1.95 gigawatts of solar generation and 3.9 gigawatt hours of battery storage systems. Such contracts are ...

This research study delves into the solar energy potential and capacity in Norway, aiming to assess the viability of solar power integration in the country's urban landscape.
