We design for independence and convenience. We create solar charging systems for electric vehicles that can drive off-grid and into all of life's adventures.

The 2026 Solterra has the off-road capability you expect from a Subaru electric SUV with standard AWD, improved range, faster charging, and more horsepower.

The car proves that solar-powered vehicles are not limited to smooth city roads--they can now handle rugged landscapes, making them ideal for remote regions with underdeveloped road ...

In this blog, we'll see some of the top electric vehicles with solar roofs. A car running completely on solar energy is still a pipeline dream, but rooftop panels are now being featured on ...

Solar-powered electric cars sound like a perfect solution, but how viable are they now, and when might your car get a top-up just by sitting outside?

Harness the power of the sun with Aptera. Designed with ~700 watts of integrated solar cells, drive up to 40 miles per day completely off the grid and enjoy 400 miles of range per full charge.

Able to travel off-road, and with no need for charging points, drivers of a solar-powered SUV are liberated to go where they please, says van Ginkel.

Solar panels in cars can provide extra range and reduce dependence on traditional charging methods. Some cars, like the Hyundai Sonata Hybrid and Toyota Prius Prime, offer solar ...
